

**The Faculty of Medicine of Harvard University
Curriculum Vitae**

Date Prepared: January 4, 2025
Name: Dr. Christopher Andrew Basham, B.A., M.Sc., Ph.D.
Office: 1620 Tremont Street
Unit 3030
Boston, MA
02120
Email: cv@andrewbasham.com
Website: <https://andrewbasham.com/>
LinkedIn: <https://www.linkedin.com/in/candrewbasham/>
ORCID: <https://orcid.org/0000-0003-0506-7936>
Open Science Framework: <https://osf.io/mny8b/>
GitHub Profile: <https://github.com/CAndrewBasham>
GitHub Webpage: <https://candrewbasham.github.io/web/>
ResearchGate: <https://www.researchgate.net/profile/C-Andrew-Basham>
Google Scholar: <https://tinyurl.com/3wz4sken>

Education:

09/2017-11/2021	Ph.D.	Population and Public Health	University of British Columbia
09/2010-02/2016	M.Sc.	Community Health Sciences	University of Manitoba
09/2004-05/2008	B.A.	Environmental/Urban Studies	University of Winnipeg

Postdoctoral Training:

03/2022-06/2024	Research Fellow	Division of Pharmacoepidemiology and Pharmacoeconomics	Harvard Medical School
-----------------	-----------------	--	------------------------

Appointments at Hospitals/Affiliated Institutions:

03/2022-06/2024	Research Fellow	Division of Pharmacoepidemiology and Pharmacoeconomics	Brigham and Women's Hospital
-----------------	-----------------	--	------------------------------

Other Professional Positions:

Year(s)	Position	Department	Institution
2008-2010	Health Policy Analyst	Health Department	Manitoba Keewatinowi Okimakanak
2012	Research Assistant	Department of Emergency Medicine	University of Manitoba
2012-2013	Statistical Analyst	First Nations Regional Longitudinal Health Survey	Assembly of Manitoba Chiefs
2013	Program Specialist	Aboriginal Health Programs	Winnipeg Regional Health Authority
2014-2015	Research Assistant	Centre for Aboriginal Health Research	University of Manitoba
2015	Research Consultant	Health Department	Manitoba Keewatinowi Okimakanak
2015-2017	Data Analyst	Manitoba Centre for Health Policy	University of Manitoba
2017-2021	Graduate Research Assistant	Tuberculosis Program	British Columbia Centre for Disease Control
2018	Teaching Assistant	School of Population and Public Health	University of British Columbia
2019	Graduate Research Assistant	Department of Pathology and Laboratory Medicine	University of British Columbia
2020-2021	Graduate Research Assistant	Canadian Disability Participation Project	University of British Columbia
2021-2022	Evidence Reviewer	McGill International TB Centre	McGill University
2022-	Statistical Consultant	Faculty of Health Sciences	Simon Fraser University

Committee Service:

Local

2022-2024	Lead, Pharmacoequity Team	Brigham and Women's Hospital
2023-2024	Member, Department of Medicine's Health Equity Innovation Pilot Program Learning Community.	Brigham and Women's Hospital

National

2015-2016	Judge, National Student Conference	Canadian Society for Epidemiology and Biostatistics
-----------	------------------------------------	---

International

2018-2023	Member, TB and Mental Health Working Group	International Union Against TB and Lung Disease
2022-2024	Member, Abstract Committee	International Union Against TB and Lung Disease-North America Region
2021-2023	Chair, Global Indigenous Stop TB Initiative	International Union Against TB and Lung Disease
2023-2024	Member, Health Equity Special Interest Group	International Society for Pharmacoepidemiology
2022-2024	Member, Abstract Committee	International Union Against TB and Lung Disease-North America Region
2024	Abstract reviewer, 40 th International Conference on Pharmacoepidemiology	International Society for Pharmacoepidemiology

Professional Societies

2011-2012	Canadian Association of Health Services and Policy Research
2012-2016	Canadian Society for Epidemiology and Biostatistics
2012-	International Union Against Tuberculosis and Lung Disease
2023-	International Society of Pharmacoepidemiology

Editorial Activities:

- **Ad hoc Reviewer**

American Journal of Public Health; BMJ Open; Canadian Journal of Public Health (x4); Clinical Infectious Disease; Cochrane; Critical Public Health; Dialogues in Health; Global Public Health; Heart; Injury Epidemiology (x2); Injury Prevention; International Journal of Tuberculosis and Lung Disease (x2); Journal of General Internal Medicine (x2); Open Forum in Infectious Disease; PLoS One (x2); Postgraduate Medicine; Risk Management and Healthcare Policy; Tropical Medicine and International Health; Virology; Virulence.

Honors and Prizes:

2006	Student of Distinction	University of Winnipeg	Grade point average
2007	Academic Proficiency Scholarship	University of Winnipeg	Grade point average
2007	Academic Proficiency Scholarship	University of Winnipeg	Grade point average
2007	United College Class of '50 Reunion Scholarship	University of Winnipeg	Competitive
2007	Manitoba Millennium Scholarship	Province of Manitoba	Grade point average
2007	Student of Highest Distinction	University of Winnipeg	Grade point average
2008	Student of Distinction	University of Winnipeg	Grade point average
2010	Health Services and Policy Research Studentship	Western Regional Training Centre	Competitive
2010	Network Environment for Aboriginal Health Research Fellowship.	Faculty of Medicine, University of Manitoba	Competitive
2011-2012	University of Manitoba Graduate Fellowship	Manitoba Health Research Council.	Competitive
2012	Summer Program in Data Analysis Travel Award	York University	Competitive
2012	National Student Conference Travel Award	Canadian Society of Epidemiology and Biostatistics	Competitive
2012	North America Region, 16th Annual Conference Travel Award	International Union Against Tuberculosis and Lung Disease	Competitive
2017-2018	Graduate Student Initiative Award	UBC Faculty of Medicine	Competitive
2021	Academic Excellence Initiative PhD Award	UBC President's Office	Automatic
2022	Buffalo Blanket Ceremony	Communities Alliances and Networks	Board of Directors
2023	Research Staff Spotlight Award	Brigham Research Institute	Nomination
2024	Pillars of Excellence Award	Brigham and Women's Hospital	Competitive

Report of Funded and Unfunded Projects

Funded

01/2021-ongoing
(unfunded)

“Survivorship Epidemiology”.

Funding: None.

Aims: The purpose of survivorship epidemiology is to share knowledge and advance theory and methods across fields of medicine (critical care, oncology, and infectious disease) in which survivorship is studied quantitatively; creating a critical mass of epidemiologists across fields dedicated to methodological research for survivorship. I propose to mix causal inference quantitative theory and methods with the rich qualitative work done on survivorship within fields and to build bridges across fields to identify generalizable strategies, methods, and tools to address common problems such as comparator selection, decomposing the causal effects of critical illness in terms of physical illness effects, treatment effects, socioeconomic repercussions, and the psychological ramifications of surviving critical illnesses.

10/2023-ongoing

“Foundations for Pharmacoepidemiology: missing and misclassified race and ethnicity data in linked Mass General Brigham electronic health record (EHR) and Medicaid/Medicare claims data.”

Funding: Brigham and Women's Hospital Health Equity Innovation Pilot HEIP-2023/24 (\$40,000). Role: Research Lead.

Aims: (1) investigate structural missingness of race and ethnicity in EHR and claims data, comparing missing vs non-missing in terms of sociodemographics, health conditions, healthcare utilization; (2) evaluate concordance of race and ethnicity in claims data compared with EHR data taking into account missingness; (3) thoroughly document race and ethnicity variables available in Medicare and Medicaid benefits and enrolment files and Mass General Brigham (MGB) EHR.

10/2023-ongoing

“Multilevel drug utilization trend analysis: a reproducible R and SAS tutorial.”

Funding: None. Role: Principal Investigator.

Aims: (1) create a tutorial on multilevel and mixed effects modeling of aggregate count data that estimates trends for numerous aggregating units (e.g., states) that is reproducible with open source R code provided freely through a public GitHub repository; (2) develop a participatory workshop that can train, and (3) build an online learning community for mixed effect and multilevel modelling in pharmacoepidemiology.

Report of Local Teaching and Training

Local Invited presentations (last 3 years):

No presentations below were sponsored by 3rd parties/outside entities.

- 07/2021 Towards survivorship epidemiology: a post-doctoral fellowship application / Oral
Division of Pharmacoepidemiology and Pharmacoeconomics, Brigham and Women's Hospital, Boston, MA
- 12/2022 Trends and characteristics of tramadol utilization in the United States, 2004-2021 / Oral
Division of Pharmacoepidemiology and Pharmacoeconomics, Brigham and Women's Hospital, Boston, MA
- 03/2023 Diseases as drugs: a target trial emulation framework for survivorship epidemiology? / Oral
Division of Pharmacoepidemiology and Pharmacoeconomics, Brigham and Women's Hospital, Boston, MA
- 05/2023 Multiple-Bias Sensitivity Analysis using Bounds / Journal Club
Division of Pharmacoepidemiology and Pharmacoeconomics, Brigham and Women's Hospital, Boston, MA
- 10/2023 Foundations for Pharmaco-equity: Missing and misclassified race and ethnicity in linked electronic health records and Medicare and Medicaid claims data, 2000-2020 / Oral.
Division of Pharmacoepidemiology and Pharmacoeconomics, Brigham and Women's Hospital, Boston, MA
- 04/2024 Race and ethnicity in causal diagrams of health disparities and in clinical prediction modelling: a journal club-style presentation of recent guidance from Howe et al. (2022) and Basu (2023)
Health Equity Innovation Pilot (HEIP) Program Learning Community, Dept of Medicine, Brigham and Women's Hospital, Boston, MA.
- 05/2024 Missing and discordant race and ethnicity variable values in linked MGB EHR–CMS claims data, 2015-2019: a descriptive investigation.
Health Equity Innovation Pilot (HEIP) Program Learning Community, Dept of Medicine, Brigham and Women's Hospital, Boston, MA.

Report of Regional, National and International Invited Teaching and presentations

Those presentations below sponsored by outside entities are so noted and the sponsor(s) is (are) identified.

Regional

03/2021 “All together now: aggregating multiple records to develop a person-based dataset to integrate and enhance infectious disease surveillance in Ontario, Canada” / Oral. Canadian Public Health Association Journal Club, Online.

International

06/2011 Tuberculosis Incidence in Six Canadian Provinces, 1996-2009: Ethnic-origin specific rate ratios and trends.
Korean Institute of Tuberculosis, Osong, South Korea, June 22, 2011 (Oral).

03/2021 “An overview of systematic reviews with a focus on depression” / Invited Presentation. In, World TB Day Webinar: Integrating TB and Mental Health Services to End the Epidemic. TB-Mental Health Working Group, International Union Against Tuberculosis and Lung Disease.
<https://youtu.be/eDH98iF-CBo?si=6Ly-mxjm9XxADTmc>.

08/2023 Tramadol use in the United States, 2005-2021. / Selected Oral Abstract. 39th International Conference on Pharmacoepidemiology, Halifax, Canada. [grant funding from AHRQ supported travel, accommodations, and registration].

Report of Teaching and Education Innovations

Causing Careers: a causal inference approach to planning education and training exposures aimed at achieving long-term work and life goals as mediated by real-world experiences.

Causing careers has three objectives: (1) educating trainees in causal inference, (2) formalizing career planning through causal inference framework terminology, applying epidemiological concepts with methodological tools such as DAGs, PICO, 2x2 tables, and basic probability theory while introducing counterfactual reasoning within the potential outcomes framework, and (3) contributing to the epidemiology's scant pedagogical research. A key implement for *Causing Careers* will be self-directed acyclic graphs (self-DAGs). Self-DAGs create immediate relevance for learning DAGs by focusing on each individual's career goals (long-term and intermediate positions as outcomes). By explicitly linking education and/or training exposures/interventions assumed to causative (necessarily or sufficiently) or at least contribute substantially) to realizing career outcomes. Potential confounding factors (time-varying or baseline with fixed effects or interactions with education exposure or third variable(s), as assumed with rationale provided by the trainee). These may affect both their education/training and career outcomes which can be discussed in terms of subject matter and in training students to understand differences between confounding, mediating, and other variables. Trainees that can identify potential confounding on their career and education pathways may devise approaches to "adjust" away or otherwise block all backdoor paths between education exposure and career outcome). Furthermore, baseline effect modification of the education/training can be included in text descriptions developed alongside the career causal graphs. Using publicly available Daggity.net software (<https://dagitty.net/>) trainees will draw these career DAGs or self-DAGs that identify their specific, measurable, achievable, relevant, and timebound (SMART) career goals (outcomes) and will describe educational interventions (exposures) to cause this goal. A starting exercise will be considering the *Causing Career's* first goal of causal inference education, where we describe the concepts that define intended outcomes of the course.

Report of Education of Patients and Service to the Community

Those presentations below sponsored by outside entities are so noted and the sponsor(s) is (are) identified.

Activities

Years	Role	Organization	Sponsor
2004	Candidate, Member of Parliament (Canada)	Green Party of Canada	Green Party of Canada
2004-2006	Policy and Platform Development Committee	Green Party of Canada	Volunteer
2005-2006	Secretary	Green Party of Manitoba	Volunteer
2005-2006	Membership Development Coordinator	Green Party of Manitoba	Volunteer
2006-2007	Board Member	Manitoba EcoNetwork, Inc.	Volunteer
2007	Candidate, Member of the Legislative Assembly (Manitoba)	Green Party of Manitoba	Green Party of Manitoba
2006-2008	Leader	Green Party of Manitoba	Volunteer
2008	National Delegate	3 rd Global Greens Congress	Green Party of Canada

Educational Material for Patients the Lay Community:

03/2023	TB or not TB? What's Happening in the Body.	One Vision, Many Paths: Indigenous Solutions for Tuberculosis and HIV.	Communities Alliances and Networks.
---------	---	--	-------------------------------------

Recognition:

2004	U of W goes greener as it looks to the future	Winnipeg Free Press
2005	The SunSet project	Alma Mater Society of UBC
2006	U of W student to lead Green Party	Winnipeg Free Press
2007	Greens promise ban on cosmetic pesticides	Winnipeg Free Press
2022	Global Indigenous Stop TB Initiative: A TB Scientific Section Working Group	International Union Against TB And Lung Disease
2023	Team of Brigham Investigators Receive Department of Medicine Health Equity Innovation Pilot Award	Brigham and Women's Hospital
